T. M. SAIFUL ISLAM

Full-Stack Web Developer & Digital Growth Specialist

saifulislamnyt@gmail.com | +880 1576-483920 | WhatsApp: 8801576483920

PROFILE

Full-stack web developer and digital growth specialist working across web development, e-commerce, performance marketing and conversion tracking. Focused on building websites and storefronts that look exceptional, work reliably, and can be measured from the first customer interaction through to the systems that report it.

EXPERIENCE

1.5 years of professional and freelance experience.

- 100+ WordPress websites completed across business, e-commerce and landing-page projects.
- Work spanning client-side builds, storefront setup, campaign structure and conversion measurement.

CORE SERVICES

- Full-stack web development Next.js, React, TypeScript, responsive and performance-focused builds.
- WordPress development business sites, e-commerce, landing pages, Elementor, redesigns, speed work.
- Shopify development store setup, theme customisation, product and collection layouts, mobile experience.
- Meta Ads marketing campaign structure, creative testing plans, pixel and event setup, monitoring.
- Server-side tracking & Facebook Conversion API event mapping, deduplication, GA4, validation and debugging.

TOOLS & TECHNOLOGIES

Next.js · React · JavaScript · TypeScript · HTML & CSS · Tailwind CSS · WordPress · Elementor · Shopify · Meta Pixel · Facebook Conversion API · Server-side tracking · GA4

SELECTED CONCEPT WORK

The portfolio includes clearly labelled concept and demonstration projects: a WordPress skincare storefront, a Shopify product store, a Meta Ads and Conversion API tracking architecture, a full-stack business dashboard, a conversion-focused landing page, and an immersive personal portfolio. No client results are claimed for this work.

WORKING PRINCIPLES

- Clarity first: structure, copy and interface each answer a question the visitor already has.
- Practical execution: build what the business needs now, in a shape that can be extended later.
- Measurement in the plan: tracking requirements are decided before launch, not retrofitted after.
- Continuous improvement: launch is a checkpoint, not the finish line.
